

RMS-AAPG 2007 Snowbird, Utah
Exhibitor Committee
Craig Morgan
craigmorgan@utah.gov

Post Meeting Comments

1. Prepare the exhibitor registration, information forms, and floor plan early, review very carefully, then begin emailing to everyone that exhibited in the past. Periodic reminders were sent out. As show time nears and other committees are working their butts off you can kick back with a light load.
2. If in a large exhibit hall the floor plan will be easy but if spread out in a resort be flexiable, may be problems with lighting, ceiling height (8 foot high booth still needs a foot for lights). Snowbird kept changing where we could have booths and where we couldn't.
3. We gave booth assignments on first come first served, but with a few exceptions. I tried to avoid putting similar businesses or similar associations next to each other. Also, non commercial exhibitors tend to register early and commercial exhibitors register later, so you'll need to mix it up so all the non commercial aren't together.
4. We included electricity as part of the standard package. Most want it and it avoids a lot of planning problems trying to keep tack of who wants electricity and who doesn't. I didn't receive a single negative comment on this but several exhibitors wrote on the forms how pleased they were with the change, these are exhibitors who probably forgot to order electricity at times in the past.
5. We paid to have routers set up so there would be WiFi anywhere there were exhibitor booths. At a resort this resulted in paying for several routers and few exhibitors seemed to use it. In a large exhibit hall, only one router should be necessary and is probably worth it for exhibitors and attendees who will use the signal on their lap tops.

6. The registrations that come with a booth are too generous. We gave 4 registrations with commercial booth and two registrations with a non commercial booth. I would recommend two for commercial and one for noncommercial.
7. Stick to one type of registration for exhibitors. We gave two full registrations and two exhibitor only registrations with a commercial booth and one full registration and one exhibitor only registration with at noncommercial booth. The only difference is an exhibitor only registration doesn't get you into the technical sessions. At RMS meetings no one checks badges at the session hall doors. Two types of registrations confused many people and made keeping track of registration numbers more difficult.
8. Be sure the exhibit hall is available on Saturday so the display company can set up curtain and rails and the exhibitors can have Sunday morning for set up (our exhibit hall was booked by someone else all day Saturday). We had a very narrow window: setup Sunday Noon to 5 PM and tear down was Tuesday at the end of the day (5 PM). I was surprised we had no complains about the narrow window.
9. Spread out the bar and food during the icebreaker to disperse the crowd as best you can, throughout the exhibit area.
10. The closing reception on the last evening was very successful; I highly recommend you do the same. It resulted in heavy traffic in the exhibit areas well past closing and prevented the problem of exhibitors packing up early.

Subject: The real list: Re: Exhibitor Wait list

Hi Craig, We were able to accomodate most on the waiting list, however here are

a few names that called after the fact & had interest in exhibiting:

- (1) PetroWeb
Gina Godfry
gina.godfry@petroweb.cpm
- (2) Exploration Development Inc.
Pat Bygott
pbygott@exdvpinc
303-840-7021
- (3) Neuralog
Alan Corporon
alanc@neuralog.com
281-240-2525
- (4) Geosearch LOgging
Kari Ann Cress
kcress@geosearchlogging.com
405-340-5545

Thanks! - Julie
